**Elliott Davis Technology Solutions, LLC (EDTS) Adds Professional in Augusta Office
*Brandon Parrish Joins Firm as Network Engineer***

AUGUSTA, Ga., Oct. 14, 2008 – Elliott Davis Technology Solutions, LLC (EDTS), a full-service technology consulting firm, announced the addition of Brandon Parrish as network engineer. He will support clients in the CSRA market.

Parrish brings more than six years of information technology experience to his new role at EDTS. He has obtained the A+ and the Network + certifications from the Computing Technology Industry Association (CompTIA), a non-profit trade association that addresses the needs of the ever-expanding computer industry by establishing professional IT industry certifications. CompTIA A+ reflects Parrish' competency as a computer technician, and the CompTIA Network+ establishes his understanding of network hardware, installation, and troubleshooting. Prior to joining EDTS in September 2008, Parrish served as a network manager with McLeod & Dowling Attorneys at Law; an IT manager with AB Beverage Company; and a network field technician with ProNET, all located in Georgia. He is a resident of Grovetown, Ga.

"We are excited to add another member to our rapidly-expanding staff at EDTS," said Charles Johnson, EDTS managing shareholder. "Each member of our team brings a high-level of technological expertise to our firm. Brandon's knowledge and experience will be another direct benefit for our clients," added Johnson.

EDTS began in 1999 with only two employees and has continually expanded its services and increased its staff. The combined knowledge of EDTS' workforce represents more than 80 years of experience in the IT industry.
